GEOMORPHOLOGY

Contents Volume 14

Research Papers

Weathering and soil development on fan surfaces as a function of height above modern drainageways, Roan Mountain, North Carolina
H.H. Mills and J.B. Allison 1

Effects of slope angle on mass movement by tree uprooting
S.A. Norman, R.J. Schaetzl and T.W. Small 19

Mass wasting and subaerial weathering in guyot formation: the Hawaiian and Canary Ridges as examples
N.C. Smoot 29

Wind tunnel experiments and field measurements of aeolian dust deposition on conical hills
Z.Y. Offer and D. Goossens 43

Nonlinear dynamics and the evolution of relief
J. Phillips 57

Logratio linear modelling of hydraulic geometry using indices of flow resistance as covariates
G.S. Ridenour and J.R. Giardino 65

Rock glacier nomenclature: A re-assessment
S.J. Hamilton and W. B. Whalley 73

Newsletter of the International Association of Geomorphologists 81

Preface 85

Glacial valley cross-profile development: the influence of in situ rock stress and rock mass strength, with examples from the Southern Alps, New Zealand
P.C. Augustinus 87

Development of glacial-valley cross sections under conditions of spatially variable resistance to erosion
J.M. Harbor 99

Hypsometric forcing of stagnant ice margins: Pleistocene valley glaciers, San Juan Mountains, Colorado
E.E. Small 109

Modelling of icecap glaciation of the northern Rocky Mountains of Montana
W.W. Locke 123

Diversion of the upper Bear River: Glacial diffluence and Quaternary erosion, Sierra Nevada, California
L.A. James 131

Insights into alpine moraine development from cosmogenic ^{36}Cl buildup dating
M.G. Zreda and F.M. Phillips 149

Numerical modeling of advective transport of saturated deforming sediment beneath the Lake Michigan Lobe, Laurentide Ice Sheet
J.W. Jenson, P.U. Clark, D.R. MacAyeal, C. Ho and J.C. Vela 157

Lobal interactions, rheologic superposition, and implications for a Pleistocene ice stream on the continental shelf of British Columbia
S.R. Hicock and E.A. Fuller 167

Landforms and structures of the waterlain west end of St. Thomas moraine, SW Ontario, Canada
A. Dreimanis 185

Newsletter of the International Association of Geomorphologists 197

Research Papers

Coarse-sediment distribution as evidence of an elevation limit for flash flooding, Bear Creek, Colorado
M.M. Grimm, E.E. Wohl and R.D. Jarrett 199

Initiation and evolution of gullies along the shoreline of Lake Huron
M.B. Burkard and R.A. Kostaschuk 211
Reach classifications of the lower Mississippi River
L.A. Orlowski, S.A. Schumm and P.W. Mielke Jr. 221
River channel adjustment to meander cutoffs on the River Bollin and River Dane, northwest England
J.M. Hooke 235
Drainage and valley asymmetry in the Tertiary Hills of Lower Bavaria, Germany
R. Wende 255

Book Reviews 267

Preface 275
Riparian vegetation and fluvial geomorphic processes
C.R. Hupp and W.R. Osterkamp 277
Effects of soil and vegetation on runoff along a catena in semi-arid Spain
J.M. Nicolau, A. Solé-Benet, J. Puigdefábregas and L. Gutiérrez 297
Responses of interrill runoff and erosion rates to vegetation change in southern Arizona
A.J. Parsons, A.D. Abrahams and J. Wainwright 311
British Columbia flood scars: maximum flood-stage indicators
A.S. Gottesfeld 319
Fluvial process and the establishment of bottomland trees
M.L. Scott, J.M. Friedman and G.T. Auble 327
The role of vegetation and bed-level fluctuations in the process of channel narrowing
J.M. Friedman, W.R. Osterkamp and W.M. Lewis Jr. 341

Effects of soil and vegetation on runoff along a catena in semi-arid Spain
J.M. Nicolau, A. Solé-Benet, J. Puigdefábregas and L. Gutiérrez 297
Responses of interrill runoff and erosion rates to vegetation change in southern Arizona
A.J. Parsons, A.D. Abrahams and J. Wainwright 311
British Columbia flood scars: maximum flood-stage indicators
A.S. Gottesfeld 319
Fluvial process and the establishment of bottomland trees
M.L. Scott, J.M. Friedman and G.T. Auble 327
The role of vegetation and bed-level fluctuations in the process of channel narrowing
J.M. Friedman, W.R. Osterkamp and W.M. Lewis Jr. 341

Newsletter of the International Association of Geomorphologists 353
